

Prompt Engineering Portfolio – AI Prompt Creator

Assignment 1 – Funny Article on Nigeria's Agricultural Sector

Prompt:

Write a 300-word friendly, funny and catchy article on Nigeria's agricultural sector that will be presented to the presidential candidate of PDP about its downfall and importance in Nigeria economy.

* Represent point in bulletins

* Very short encouraging conclusion and summary

AI Response:

Nigeria's farmers still use hoes and cutlasses like it's 1960.

We import rice from Thailand while Niger farmers are chilling.

Our yams are strong enough to fight back when you peel them.

Fertilizers disappear faster than campaign promises.

Mechanization? One tractor per 200 villages – and it's always 'under maintenance.'

Export? Even snails cross the border faster than our produce.

Extension workers? Only show up during election season.

Youths prefer tech to touching soil – who can blame them?

Farmland disputes last longer than Nollywood trilogies.

Climate change: our farmers now pray more than plant.

In conclusion:

Nigeria's agriculture can still feed the nation and the economy — if we give it the same energy we give elections.

Mentor Score: 25/25

Excellent. Fun, culturally relevant, and bullet-based. Portfolio-ready.

Assignment 2 – Compare ChatGPT vs Claude for Students

Prompt:

Compare in 200-words why students should use ChatGPT instead of Claude when it comes to studying and brainstorming

- * Represent reasons in bullet
- * Bold them
- * Very serious and advisable tone
- * No conclusions and summary

AI Response:

ChatGPT has stronger contextual memory. It remembers what you've said earlier in the conversation better than Claude.

ChatGPT gives more structured answers. It often breaks responses into cleaner outlines or formats.

ChatGPT is better with creative writing. Students needing stories, scripts, or essay drafts will benefit more.

ChatGPT is more available and integrated. It powers many apps, bots, and tools already used in learning.

ChatGPT supports multiple writing tones and styles. It can mimic a textbook or explain like a friend.

ChatGPT is more accurate in answering textbook-based questions. Claude is improving, but GPT-4 remains the leader.

ChatGPT works better under pressure. Even with vague prompts, it tries to understand and assist.

Mentor Score: 25/25

Serious tone matched, bullet structure used well. Strong educational prompt.

Assignment 3 – Business Plan for an Internet Café

Prompt:

As a Nigerian business entrepreneur write a 150-words business plan on Internet café

- * Make it catchy and interesting
- * Represent point in bulletin
- * No jargons, summary and conclusions

AI Response:

Business Name: NetSpot Café

Located near schools & hostels for hot traffic

Fast Wi-Fi and power backup (No NEPA wahala)

Print, scan, lamination & WAEC/NYSC registration services

Mini snack & drink corner for comfort

Daily and hourly pricing to fit all budgets

Loyalty card: 5 visits = 1 free hour

Social media promos to pull Gen Z crowd

Monthly profit goal: ₦150,000 – ₦300,000

Growth plan: Add gaming & training classes

Mentor Score: 25/25

Perfect structure, tone, and real-world value. Can be used commercially.

Assignment 4 – Instagram Caption on Growing Up with African Parents

Prompt:

As an Instagram content creator – create a 35-word funny article

Topic: Growing up with an African parent

Audience: adult (20–25)

Tone: funny, simple

* No conclusions and summary

AI Response:

You haven't known true fear until your African mum says,
'So you now sleep by 8?'

That's the same woman who used to beat Wi-Fi out of the air with her slippers.

Mentor Score: 25/25

Perfect humor, format, and tone. Short-form content mastery.

Assignment 5 – Target Audiences for Bank Savings Account

Prompt:

As a bank marketer create a 3 profitable target audience for a bank savings account

- * Represent point in bulletin
- * No summary and conclusions
- * 200-words
- * Friendly and simple tone

AI Response:

University Students (Ages 18–25)

Students may not earn much now, but they're always saving for small goals: school projects, phone upgrades, travel, or "emergency jollof." Catching them young builds lifelong loyalty, especially when the account comes with free mobile banking and discounts on school items. A savings culture now = a solid customer in 5 years.

Small Business Owners & Side Hustlers

From fashion vendors to POS agents and food delivery folks — Nigeria's informal sector is booming. Many just need a safe space to drop daily earnings and withdraw later. A well-marketed savings account with zero maintenance

nce fees and quick loan access will easily win this group. Add mobile alerts and they're sold.

Young Parents (Ages 28–40)

This group thinks long-term: school fees, rent, and family emergencies. A savings account tailored for family planning or even child education savings will speak their language. A joint savings option with spouse access or goal-based features makes it both emotional and practical.

Mentor Score: 25/25

Friendly, professional, practical. Nigerian context well addressed. Commercial-ready.
